20UGS (UCITS) FUNDS FIERA GLOBAL EQUITY

Class P EUR LU1389831964

A Sub-Fund of 20UGS (UCITS) FUNDS

Sub-fund managed by: Duff & Phelps (Luxembourg) Management Company S.à r.l.

Objectives and Investment Policy

Investment Objective : The Sub-Fund aims to provide long-term capital appreciation through a portfolio of broadly diversified securities, by region and industry, invested across world markets.

The Sub-Fund will seek to achieve over the longer term the highest possible return that is consistent with a fundamental investment philosophy through investment primarily in global equity securities.

For the avoidance of doubt, investors should note that the Sub-Fund will not track the performance of the benchmark MSCI World 100% Hedged to EUR Net Total Return, rather the benchmark MSCI World 100% Hedged to EUR Net Total Return has been included as an indicative point of reference against which the performance of the Sub-Fund may be measured.

Investment Policy : To achieve the Sub-Fund's objective, the Investment Manager will select investments based on fundamental research and analysis. Security selection is ultimately based on an understanding of the company, its business and its future prospects. The Investment Manager will seek companies with sustainable competitive advantage and growth potential which trade at attractive valuations.

The Sub-Fund will invest primarily in large and medium companies throughout the world, although the Investment Manager may take advantage of attractive opportunities in small-cap companies; diversifies investments by industry groups, economic drivers and/or investment themes.

The Sub-Fund may invest up to 15 percent of its net assets in emerging markets and up to 25 percent of its net assets in deposits or money market instruments to preserve capital in the event of adverse market conditions. The Sub-Fund may use forward foreign exchange contracts for hedging purposes. The Sub-Fund may invest up to 10 percent of its net assets in Units/shares of UCITS and/or other UCIs.

The Sub-Fund's portfolio turnover rate may be greater than 70 percent. The higher a Sub-Fund's portfolio turnover rate, the greater the chance that a taxable investor may receive a distribution that must be included in income for tax purposes and the higher the trading costs for the Sub-Fund.

The Sub-Fund is actively managed without reference to the benchmark MSCI World 100% Hedged to EUR Net Total Return.

Risk and Reward Profile

The value of an investment in the Sub-Fund can go up and down. When you sell your shares, they may be worth less than what you paid for them. If your currency as an investor is different from the subscription currency of the Sub-Fund, changes in currency exchange rates could reduce any investment gains or increase any investment losses.

There can be no assurance that the Sub-Fund's investment objective will be achieved or that there will be any return of capital, and investment results may vary substantially on a monthly, quarterly or annual basis. Shares are a potentially suitable investment only for sophisticated investors for whom an investment in the Sub-Fund does not represent a complete investment program and who, in consultation with their own investment and tax advisors, fully understand and are capable of assuming the risks of an investment in such Shares.

The risk/reward rating above is based on medium-term volatility (actual or estimated variations in the Sub-Fund's share price over five years). Going forward, the Sub-Fund's actual volatility could be lower or higher, and its rated risk/reward level may be changed.

The risk category has been determined on the basis of historical and/or simulated data and may not be a reliable indication of the sub-fund's future risk profile.

The Sub-Fund's risk level reflects the following:

• As an asset class, shares carry higher risks than bonds or money market instruments.

• **Volatility :** The prices of the Sub-Fund's investments, including common equity, can be highly volatile. The Sub-Fund's long-only strategy may result in a greater level of volatility in comparison to other funds that pursue other investment strategies.

• **Investment in speculative instruments :** The Sub-Fund may invest in securities, options and derivatives that are highly volatile and speculative.

The rating does not reflect the possible effects of unusual market conditions or large unpredictable events, which could amplify everyday risks and could trigger other risks, such as:

Counterparty risk The Sub-Fund could lose money if an entity with which it does business becomes unwilling or unable to honor its commitments to the Sub-Fund.

Derivatives risk Certain derivatives could increase Sub-Fund volatility or expose the Sub-Fund to losses greater than the cost of the derivative.

Liquidity risk Certain securities could become hard to value, or to sell at a desired time and price.

Management risk Portfolio management techniques that have worked well in normal market conditions could prove ineffective or detrimental during unusual conditions.

Operational risk In any market, but especially in emerging markets, the fund could lose some or all of its investments through fraud, corruption, political or military actions, the seizure of assets, or other irregular events.
