

Addendum dated 10 March 2021
to the
Prospectus dated 21 December 2020

NUVEEN GLOBAL INVESTORS FUND PLC

(An investment company with variable capital incorporated with limited liability in Ireland with registered number 434562 and established as an umbrella fund with segregated liability between funds pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011, as amended.)

This addendum forms part of, and should be read in conjunction with, the prospectus dated 21 December 2020 (the “**Prospectus**”) issued by Nuveen Global Investors Fund plc (the “**Company**”). Capitalised terms shall have the same meaning herein as in the Prospectus, except where the context otherwise requires.

The Directors of the Company whose names appear on page v of the Prospectus accept responsibility for the information contained in this addendum. To the best of the knowledge and belief of the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this addendum is in accordance with the facts and does not omit anything likely to affect the import of such information.

Amendments to the Prospectus

With effect from the date hereof, the Prospectus is amended as follows:

On page 33 of the Prospectus, in the section entitled “Investment Objective and Policies”, the following section shall be added:

ESG, Impact and Sustainability Considerations

The Company has adopted the Investment Manager’s sustainability risk statement (the “Statement”) in order to integrate sustainability risks into investment decisions for the Funds. A sustainability risk is an environmental, social or governance event or condition that, if it occurs, could cause an actual or a potential material negative impact on the value of an investment.

While the Statement is applicable to the Investment Manager and all of its affiliates, including each Sub Investment Manager, each Sub Investment Manager takes a unique investment approach to pursuing competitive risk-adjusted returns on behalf of the Funds.

Each Sub Investment Manager considers ESG factors as part of its investment research, due diligence, portfolio construction and ongoing monitoring as part of its active portfolio management strategy for the relevant Funds.

The likely impacts of sustainability risks on the returns of each Fund will depend on each Fund’s exposure to such investment and the materiality of the sustainability risk. The risk of a sustainability risk arising in respect of each Fund should be mitigated by the relevant Sub Investment Manager’s approach to integrating sustainability risk in its investment decision-making and the applicable Fund’s investment policy. However, there is no guarantee that these measures will mitigate or prevent a sustainability risk materialising in respect of a Fund.

Further information on the Company and the Investment Manager’s Statement is available at www.nuveen.com/ucits.

The Company’s remuneration policy takes into account compliance with its policies related to the integration of sustainability risks in its investment decision making process.

No Consideration of Adverse Sustainability Impacts

In addition to integrating material ESG factors across investment processes, the Company and the Investment Manager believe that all investments have impacts on society and the environment. The Investment Manager aims to assess these effects and, where possible, promote the positive and mitigate the negative. Across asset classes, a growing number of opportunities exist for pursuing specific, measurable and positive social and environmental results that contribute to long-term financial returns. The Investment Manager is dedicated to identifying such opportunities and measuring the impact of those investments. In addition, the Investment Manager seeks to engage with management, boards, tenants and operators to encourage ESG best practice, with the ultimate goal of better outcomes for people and the planet.

The regulatory environment in which the Company and the Investment Manager are operating is evolving and the expectations of competent regulatory authorities regarding how ESG factors and their adverse impacts should be defined and evaluated are not yet developed to the full extent. As such, there is no definitive guidance available at this time in relation to the systems, controls and measures that would need to be put in place in order to provide a principal adverse impacts statement in line with the requirements of Article 4(1)(a) of SFDR.

In light of these circumstances, the Company applies Article 4(1)(b) of SFDR and does not currently consider adverse impacts of investment decisions on sustainability factors for all Funds but will continue to keep this decision under review as matters evolve.

With regard to the Nuveen U.S. Core Impact Bond Fund, which has a sustainable investment objective as described in the section of the Prospectus entitled “Investment Objective and Policies of the Funds”, the Company shall consider adverse impacts of investment decisions on sustainability factors and shall make the relevant disclosures in this regard by 30 December 2022 in accordance with the requirements of Article 7(1) of SFDR and the applicable regulatory technical standards.

Further information on the Company and the Investment Manager’s consideration of adverse sustainability impacts is available at www.nuveen.com/ucits.

On page 23 of the Prospectus, at the end of the section entitled “Nuveen Winslow U.S. Large-Cap Growth ESG Fund”, the following section shall be added:

Promotion of Environmental or Social Characteristics

The Fund promotes, among other characteristics, environmental or social characteristics in the manner described above but does not have as its objective sustainable investment.

On page 31 of the Prospectus, at the end of the section entitled “Nuveen U.S. Core Impact Bond Fund”, the following section shall be added:

Sustainable Investment Objective

The Fund has a sustainable investment objective and seeks to attain this objective in the manner described above.

On page 53 of the Prospectus, the section entitled “Certain Risk Factors and Investment Considerations”, the section entitled “ESG Guidelines Risk – Nuveen Winslow U.S. Large-Cap Growth ESG Fund and Nuveen U.S. Core Impact Bond Fund” shall be replaced with the following:

ESG Guidelines Risk – Nuveen Winslow U.S. Large-Cap Growth ESG Fund and Nuveen U.S. Core Impact Bond Fund The Nuveen U.S. Core Impact Bond Fund has a sustainable investment objective and seeks to attain this investment objective in the manner described in the section of the Prospectus entitled “Investment Objective and Policies of the Funds”. The Nuveen Winslow U.S. Large-Cap Growth ESG Fund seeks to promote certain environmental or social characteristics in the manner described in the section of the Prospectus entitled “Investment Objective and Policies of the Funds”.

The investments held by the Nuveen Winslow U.S. Large-Cap Growth ESG Fund and the Nuveen U.S. Core Impact Bond Fund are subject to certain ESG and/or Impact criteria and as a result investments that are deemed to be inconsistent with such criteria may be excluded. As a result, the universe of investments available to the Fund may be more limited than other funds that do not apply such criteria. The application of the ESG and/or Impact criteria could result in performance that is better or worse than the performance of other funds that do not apply such criteria, depending on the performance of the excluded investments and the investments included in place of such excluded investments.

The data used to determine whether companies are managed and behave responsibly may be provided by third party sources and is based on backward-looking analysis. The subjective nature of non-financial criteria means a wide variety of outcomes are possible. The analysis is also dependent on companies disclosing relevant data and the availability of this data can be

limited. These limitations are mitigated through the use of a variety of data sources and the relevant Sub Investment Manager's own in-house research.
